Creating an Independent Bibliography

There may be times when you just want to create a bibliography without in-text citations (e.g., a reading list, key articles on a topic, list of articles written by a particular author). To do this, follow these steps:

1) Go to your EndNote library

2) **Highlight the references** you wish to include in your bibliography.
3) From the **References** menu at the top, select **Show Selected References**. If you want your entire EndNote library included in the bibliography, you can skip this step.

4) **Sort** your references in the order in which you want them to appear in the bibliography. You can easily sort by Author, Year, Title, etc. by clicking on the appropriate column header.
5) From the style drop-down menu in the top left, choose the **output style** you want to use for your bibliography.

![Style drop-down menu with APA 6th selected]

6) Go to the **Edit** menu and choose **Select All**.

7) Go to the **Edit** menu again and choose **Copy Formatted**.

8) **Open a Word document** and paste (or Ctrl + V) the references into a Word document.
